"A friendly, efficient sales service"

TO THE TRADE

This List Cancels All Previous Lists

Packing. Net f. o. b. our shipping points. Packing charges are extra. We make no charge for packing car lot orders in bulk.

NOTICE!

We anticipate that there will be many shortages before the Planting Season is over. All prices in this list are subject to change without notice. All quotations are made for immediate acceptance and with the understanding that all orders placed by us with our shippers are placed subject to shipper having stock on hand at the time your order is received. We advise you to place all orders early.

Prices are subject to change without notice.

Orders are accepted on condition that they shall be void should stock become injured by frost or other causes beyond our control. We cannot be responsible for loss caused by damage or delay in transit. If such damage occurs, it must be reported and entered immediately with your local agent of the transportation company.

Claims for error or shortage will be gladly corrected, but we must be notified within **ten days** after arrival of the stock. Such claims must be based upon an actual check of material at the time shipment arrives and not after it has been sold or lined out.

Quantity Discount. Five plants furnished at the 10 rate, 25 at the 100 rate and 250 at the 1,000 rate.

Guarantee. Prices do not include any guarantee of growth.

Terms. All accounts are due and payable 60 days from date of invoice. Cash, security, or satisfactory Trade references will be required from unknown parties. Interest at 6% will be charged upon all past due accounts. Cash discounts: 2% 10 days; 1% 30 days from date of invoice.

Where quantity ordered is of sufficient amount we can arrange for shipment by motor truck at reasonable rates. Our favorable locations make it advantageous for our customers to come with their trucks and take away their purchases.

OUR SERVICE

We always use the greatest care in placing orders for material where we believe the customer's interests will be best served as regards transportation, etc. Sometimes we receive orders for material of which we are either sold out or do not list. In such cases we fill the order, if possible, from the nearest source of dependable stock. This service, we believe, means much to our customers, especially during the busy planting seasons.

FORMULA "66"

A Hormone Powder for the general promotion of the root system on cuttings, seeds and bulbs.

Cuttings dipped in Formula "66" will root in less time and form a much larger root mass. Also helps rooting bed to be free from mildew, rot, etc., due to a certain chemical combination.

Using Formula "66" is the ideal way to root all kinds of cuttings. Constant tests have shown as high as 90 percent strike in all types of cuttings.

Seeds—Seeds of all kinds dusted with Formula "66" will show a very high percentage of germination and develop into sturdy seedlings because Formula "66" not only helps germination but also feeds the young plants.

TREE WISTERIA

F. O. B. Ohio Shipping Point

No more lovely sight can be imagined than a Tree Wisteria in bloom. The purplish blue flowers completely cover the tree during May, transforming it into a sheer beauty. In formal gardens, Tree Wisterias are indispensable. On the lawn they develop into beautiful specimens and live for generations increasing in beauty and dignity each successive season. The plants we offer are grown on stems about 4 feet high and the crowns are about 2½ to 3 feet in diameter. Every plant has bloomed.

Blue. The most popular color Each \$3.50, Doz. \$36.00

White. Silvery white blooms Each \$4.50, Doz. \$46.00

TRUE HEDGE COLUMNBERRY OR COLUMN BARBERRY

(*Berberis thunbergi erecta*)

United States Plant Patent No. 110

A fine upright new form of Barberry, pyramidal, with a very dense growth and heavy foliage evenly distributed from the ground up; berries similar in color and size to *Berberis thunbergi*. Can be grown like boxwood. Very desirable for compact hedges and a welcome addition to our list of Hedge Plants.

Hedge Sizes	10 rate	100 rate	1,000 rate

(We are offering these plants for shipment from Westfield, Mass., under license from the originators.)

BERBERIS MENTORENSIS

U. S. Plant Patent No. 99

"Mentor Barberry"

A remarkably fine hedge plant that withstands heat and drought. This plant is the result of a cross between *Berberis thunbergi* and *Berberis Juliana*. Foliage is a good dark green and upright in habit. We offer these plants for shipment from Westfield, Mass., under license from the originators.

HYBRID BLUEBERRY PLANTS

In view of the increasing interest in cultivated Blueberries we are pleased to announce that we can supply this material from a reliable grower. Hybrid Blueberries are becoming very popular, both for their landscape value and commercial returns. Our source of supply is one of the very best.

We offer the varieties Cabot, Rubel, Concord, Pioneer, Runcocos.

GOLD FLAME HONEYSUCKLE

(*Lonicera heckrottii*)

This is one of the finest of the new introductions. The bright coloring of the flowers (flame pink with the inside golden yellow) together with its fine foliage make it a very beautiful vine. Blooming period is from early Spring until heavy frosts in the Fall. We offer field grown plants.

2 yr., No. 1..... Per 10, \$3.50; Per 100, \$30.00

RETAIL PRICES.—It is the established policy that purchasers of these patented and nationally advertised roses shall not list or sell them at less than the per each or per dozen retail prices as established for the current season (not less than three of a kind at dozen rates) or include them in any group, collection or combination offers except in connection with other patented roses, the retail selling prices of which are definitely established, and then only in groups of not less than three patented plants and at a total selling price for the group figured at not less than the dozen rate of each plant in the group—also that these patented plants are not to be featured as a premium in any instance and that failure to comply with this policy will result in discontinuance of the supply. **NOTICE.**—We offer these above mentioned Patented Roses as Sales Agent for licensed Distributors.

HYBRID TEA ROSES

Available for delivery Spring 1941. The following prices apply to No. 1 field grown Roses. Medium, or 1½ grade, are supplied at 30% less than the printed prices. Prices herein listed are for 100 quantities. For small amounts price is 5c additional per plant. All shipments from West-field, Massachusetts, New Jersey, or northern New York.

\$2.50 per 100; \$15.00 per 1,000.

BRISTOL'S NEW HEMEROCALLIS**ENCHANTRESS. (Bristol Nurseries, Inc.)**

Our first offering in this particular group. Its medium-sized blossoms, perfectly formed, are carried in clusters on tall, stately stems. The color is a soft yellow, deepening to a faint copper-gold, with just a slight flush of tender pink in the throat. The plant is erect, tidy, and vigorous, growing to a height of $3\frac{1}{2}$ feet. Particularly lovely for decorative uses if cut just before opening. Mid-July and August.

75c each; \$7.50 per dozen.

Descriptions of 1941 Chrysanthemum Introductions

*MRS. PIERRE S. DUPONT III (seeding 19-38 c.k.)—The quality of iridescence is so pronounced in this fine new chrysanthemum that accurate description is difficult. The dominant shade is a soft peach tinted with rosy-salmon and fawn shades; the whole overcast with an indescribably luminous sheen. It is entirely distinct and altogether lovely. The large, full, perfectly formed flowers are carried on tall branching stems, making a strong, sturdy, 2 1/2-foot plant. In full flower in early October, it will prove a grand addition to the garden and an invaluable cut flower variety.

*EUGENE A. WANDER—A big, brilliant, glistening golden yellow beauty, flowering so freely that the stocky growing plant is almost obscured by its branching clusters of big double flowers—each one the

* Prices top of page.

height of perfection in form. Plant seldom exceeds eighteen inches and is in full flower by September 20th—therefore valuable where earliness is important. It is a hardy, easily grown variety, requiring no pinching or special handling to produce flowers $4\frac{1}{2}$ to 5 inches across, or larger if disbudded. Fine also for pot culture.

NOTE: Occasional plants assume bronzy-yellow tints, but are just as attractive.

A New Type

***MILKY WAY (seeding 2-38 C.N.)**—A magnificent creamy white seedling bred from the species *C. Nipponicum*; it has the distinction of being the first hybrid from this species parent ever introduced and will, we believe, prove the forerunner of a type which will add many desirable qualities to the garden 'Mum, just as did the Hybrid Korean type, which we introduced some years ago. **MILKY WAY** is outstanding among all white kinds—first, for the remarkable intensity of its milky white color in the open flower; again, for its rich dark green foliage which contrasts so effectively with the soft lemon tints of the opening flower, creating an effect distinctly different from that of any other white variety. Blossoms are of the semi-double informal type, with broad overlapping petals and are carried in branchy sprays of 5 to 6. Unusually hardy as a plant, the open flower is remarkably frost resistant—a valuable trait where early frosts may injure the opening flower, particularly on white kinds. A strong, vigorous plant $2\frac{1}{2}$ to 3 feet in height, flowering in late September.

HARDY CHRYSANTHEMUMS

Except in the most Northern part of our territory, we wish to call to your attention the value of **HARDY CHRYSANTHEMUMS**. The earlier and more dwarf varieties give an abundance of flowers of a good color range. These are followed by the vivid colorings of the Korean Hybrids originated by Bristol Nurseries. These superb varieties will flower from September 1st to October 20th, depending upon variety. When flowers are scarce these Mums brighten up the garden as nothing else can brighten it at that time of year. In the colder areas and in sections exposed to frost these plants will often start blooming after having been frosted. All in all, there is nothing to equal the Bristol Koreans for Fall flowers. To the Florist, even in areas where early frosts occur, we unhesitatingly recommend Korean Mums as a plant to be grown in frames and sash-houses. This type of Mums as a late fall cut flower is enthusiastically welcomed by the buying public as it is impossible to duplicate the Korean colors in the greenhouse varieties. We have Florist customers who find these Koreans a welcome addition to their list of Mums. Write us for a list of varieties best adapted for cut flower use. Also write for our color plate of Korean Mums. Also remember that all Koreans are not Bristol's. Ask for the varieties originated by Bristol Nurseries. There is a reason. See list of varieties and prices on page 60. Be sure to visit Bristol Nurseries in September and October to see these Chrysanthemums in flower.

* Prices top of page 60.

PHYSOSTEGIA OR FALSE DRAGONHEAD

SUMMER GLOW (3-32). Towering stems often exceeding four feet, terminating in colorful spikes eighteen inches in length; similar to the parent, "Gigantea" but of a rosy crimson color that is altogether attractive and far more effective. A splendid background or cut-flower variety, it will supersede the older kind. Height, 4 feet. In full flower mid-August.

ROSY SPIRE (4-34). Similar to the above but a shade deeper in color. Somewhat more compact in its inflorescence, it resembles the rosy crimson parent "Vivid" but attains a height of 3 to 3½ feet and is decidedly colorful in mid-September.

3 in. Pots, \$2.50 per doz.; \$12.00 per 100.

Formula "66"

A Hormone powder for the general promotion of the root system on cuttings, seeds and bulbs.

Cuttings dipped in Formula "66" will root in less time and form a much larger root mass, also the rooting bed will be free from mildew rot due to a certain chemical combination, before removing your rooted cuttings water with Formula "67" and so gain time by preventing the usual set-back caused by transplanting.

Flower Seeds dusted with Formula "66" will show a very high percentage of germination developing into sturdy seedlings because this formula not only helps germination but also feeds the young plants. It protects seedlings against damping off. Flower seeds like Asters, Antirrhinums, Delphinium, Petunia, Primula and Verbenas will show highly satisfactory results when treated with Formula "66". Water with Formula "67" before transplanting.

Vegetable Seeds. Formula "66" when used on vegetable seeds pay large dividends in better and heavier

Formula "66"—Cont.

crops. Root crops such as Beets, Carrots, Radish mature in less time through the early development of a healthy root system. Seeds of Tomatoes, Peppers, Lettuce should always be dusted with "66" to insure a good root system, reducing damping off to the minimum. Read what Formula "67" will do for vegetables that are started on Formula "66".

Lawn Grass Seeds. To secure success in making a good lawn you must have a strong deep rooting system in the grasses used. With the soil well prepared, the grass seed dusted with Formula "66" at the rate of one ounce to ten pounds of seed the rooting system will be heavier and deeper. This is essential to a vigorous heavy turf.

Avoid the summer trouble of dried out lawns by securing deep strong roots in the grass. Lawn grass seed treated with Formula "66" followed by our recommendations for Lawns in article on Formula "67" will give you results that make for satisfied clients.

FORMULA "66"

A Hormone Powder for the general promotion of the root system on cuttings, seeds and bulbs.

Cuttings dipped in Formula "66" will root in less time and form a much larger root mass. Also helps rooting bed to be free from mildew, rot, etc., due to a certain chemical combination.

Using Formula "66" is the ideal way to root all kinds of cuttings. Constant tests have shown as high as 90 percent strike in all types of cuttings.

Seeds—Seeds of all kinds dusted with Formula "66" will show a very high percentage of germination and develop into sturdy seedlings because Formula "66" not only helps germination but also feeds the young plants.

Formula "67"

"HYDRO-POSIT"

All vegetation takes up its food requirements through the hair-like roots on a water film base. Unless the plant food applied is dissolvable the grower's effort to feed his plants is wasted.

Formula "67" has been checked and double checked on tender seedlings, lawns, perennials, flowering shrubs, evergreens, and trees, follow carefully the directions given you with every packet. This formula is different. It is odorless and harmless. Will make for healthier plants which in turn is building up resistance to disease.

Avoid all set-backs to your plants, trees and shrubs when transplanting by using this formula.

Viticulturists become enthusiastic when they see the results in their grapevines, the fruit is heavier and better flavor.

Apply Formula "67" to all fruit trees when blossoms appear to prevent blossoms from dropping. Apply

Formula "67"—Cont.

again in August month for setting of buds for the following year's crop.

Vegetables show a distinct improvement, the increased food value in green or root vegetables is very pronounced. Tomatoes fed with "67" has attracted the attention of growers who have observed absence of watery juice replaced by a rich luscious appetizing crop that pleases and satisfies the consumer.

Lawns, should be fed every four to six weeks at the rate of one gallon to twelve square feet. Apply with a pressure spray. It will not burn or harm the grass even when applied during the heat of the summer months.

A good lawn helps the general appearance of all gardens. Secure that green velvety appearance by the regular use of Formula "67".

Pot Plants in the Home or Conservatory will keep in a healthy condition if Formula "67" is used once every two weeks.
